

HOW TO MAKE THE PAPER PUMPKIN

WINTER COTTAGE

1. Cut each shape out of the cardboard box. Shapes are to scale.

BASE & WALLS

For easier assembly, cut Walls F & H in one piece, on a scored corner of the box.

Trace this shape over the base; this will provide you with a guide for wall placement.

BASE & WALLS

E. ROUND WALL

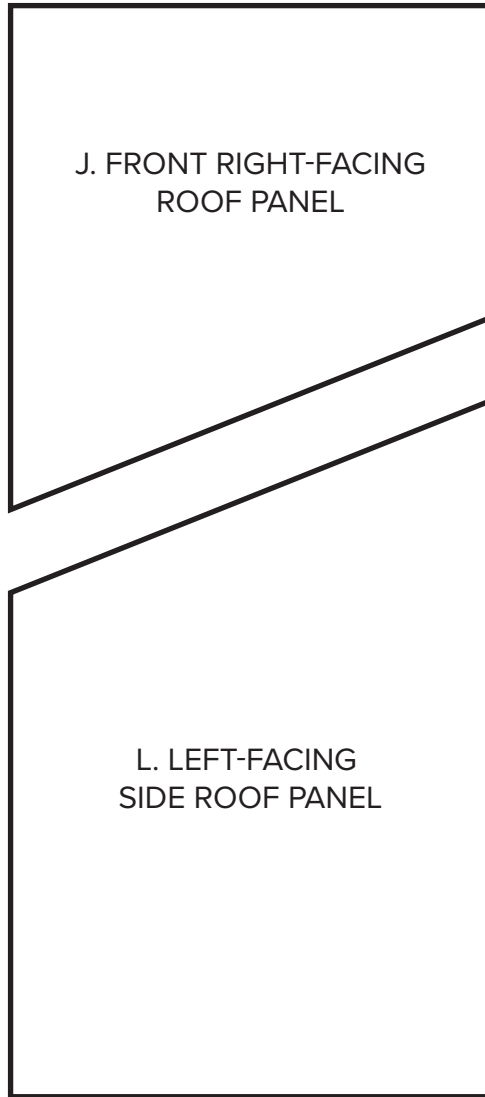

Make several vertical score lines in the round wall so that it can easily bend into a round shape.

TIP: Pay attention to which side of the cardboard you are working on. These shapes are meant to be placed on the inside of the box (brown side).

TIP: Cut out the windows and door before assembling.

ROOF

All roof pieces are oriented as shown. To help with alignment, draw two lines that are 1/4" from the edge of the bottom right angle. This is where the roof pieces line up with the walls they're attached to.

- Cut lines
- Alignment lines

Align the drawn lines with the edges of the walls.

TOP VIEW

Before attaching the round roof, make two small cuts in panels J and K where the round wall meets them. Push the round wall into the cuts you made so that all roof pieces fit snugly on top of the walls.

ROUND ROOF

Score along the dotted lines and bend into the round roof shape. Then glue the two straight edges together.
