

TURTLE-Y AWESOME CARDS

SHELL CARD

My goal for this card was to look like a turtle shell so I used the Triple Time Technique to cut the hexagons from a single layer of Designer Paper.

- **How to make the Shell Card:**

- Basic Black Cardbase: 8-1/2" x 5-1/2"
 - Score in half at 4-1/4"
- Designer Paper: 5-1/2" x 4-1/4"
- Basic White Inside: 5-1/4" x 4"
- Stamp the words in Versamark and heat emboss in white. Cut out with Paper Snips.
- Line up 2nd Largest and Smallest Hexagon Dies (Meant to Bee) in the center of the designer Paper and also from Basic Black.
 - Each hexagon die cuts 2 pieces the solid inside and an outline border. Use the DSP for the inside, and the Black for the frame around each layer.

- **How to line up and assemble the card:**

- Attach the 2 side layers to the card base with Seal Adhesive.
- Wrap the ribbon around the front of the card and tie in a bow.
- Attach the largest hexagon pieces with Black Dimensionals.
 - Tip: To keep the outline of the hexagon attached to the designer paper, attach the dimensionals to the back of the layers overlapping the Black cardstock outline and designer paper.
- Attach the smaller hexagon pieces in the center of the larger hexagon. I wanted this layer to pop out higher so I stacked 2 dimensionals under it.
- Attach the words and Shades of Green Hexagon embellishments.
