

# How to Use the STAMPIN' HOT FOIL SYSTEM

## EASY STEPS FOR BEAUTIFUL RESULTS

Add stunning foil details to your projects  
in just a few simple steps!

1

### Heat the MACHINE

- Plug in the machine and allow it to heat for approximately 7 minutes.
- The red light will come on, and the machine will beep when it is heated.

2

### Heat the HOT FOIL DIE

- Place the hot foil die on the machine with the flat side down.
- Press the time button.
- The yellow light will come on while the die is heating.
- When the die is ready, all three lights will be on, and the machine will beep.

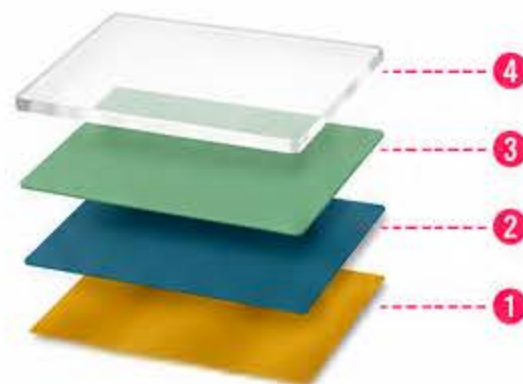

3

### Build Your FOILING SANDWICH

- Place the materials on the heated die in this order:

- 1 Foil (shiny side down)
- 2 Cardstock
- 3 Green Hot Foil Shim
- 4 Clear Spacer

4

### Run It THROUGH

- Unplug the machine.
- Carefully remove the platform with the plates still in place.
- Carry the entire sandwich to your machine.
- Roll through very slowly.
- **Never reverse.**

5

### Reveal the FOILED IMAGE

- Remove the plates and carefully peel the foil away from the cardstock to reveal your beautiful foiled image.
- Use the Magnetic Pick-Up Tool to safely remove the hot foil die and place it on the silicone mat.

## THE FOILING SANDWICH

Bottom → Top

- 4 CLEAR SPACER
- 3 GREEN HOT FOIL SHIM
- 2 CARDSTOCK
- 1 FOIL (Shiny side DOWN)

### TIP

A little patience goes a long way! Rolling through slowly gives the best, most even results.

## TAMI'S TIPS

- ✓ Foil goes SHINY SIDE DOWN.
- ✓ Roll through your machine SLOWLY.
- ✓ Save your foil scraps—they're perfect for tiny greetings and accents!
- ✓ Use the Silicone Cooling Pad for safe handling.
- ✓ Always unplug before moving the platform.
