Noel Greetings Stable Door Fun Fold

Just like a stable door, **only the bottom half swings open** to reveal the inside of the card!

CARD BASE CUTS

- **Card base (from kit):** 8-1/2" x 5-1/2", scored at 4-1/4"
- **Front panel:** cut the front down so it is 2-1/2" high (measured from the bottom)
- **Strips:** 4-1/4" x 2" cut from the card base scraps, using either side (Mossy or White)
- **White card only:** add one more 4-1/4" x 3" strip

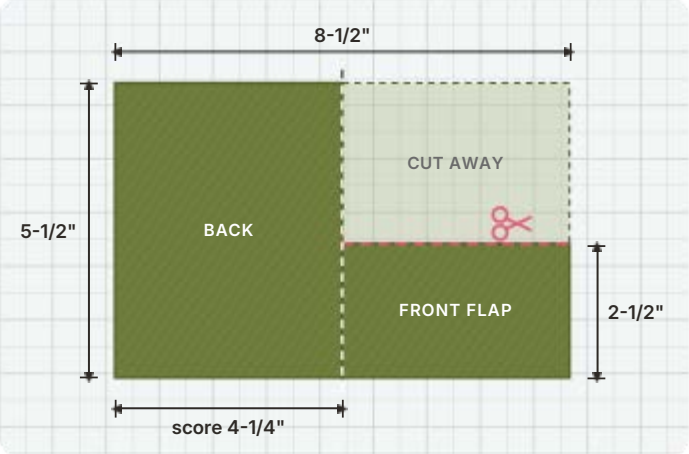

INSTRUCTIONS

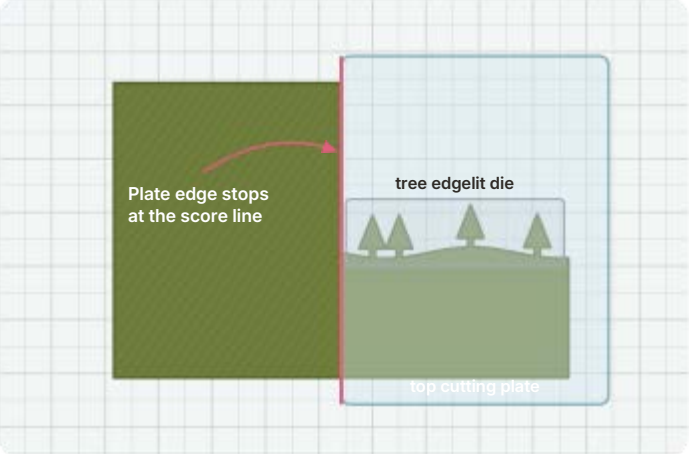

1. Stamp the house from Welcome Noel in Pecan Pie ink and the words in Mossy Meadow ink.
2. Using the Stampin' Cut & Emboss Machine, die cut:
   - the house
   - the tops of the strips with the Welcome Noel tree edgelit
   - the top of the card base front flap

   > **Tip:** Slide the top cutting plate only up to the score line so you don't cut into the back of the card base.
3. Attach the die-cut strips, trees facing up, to the front of the card.
4. Tuck the house in between the strips.
5. Attach the "Noel" greeting from the kit with Stampin' Dimensionals.
6. Finish decorating your cards!

STEP-BY-STEP

1. Score the 8-1/2" x 5-1/2" card base at 4-1/4", then cut the front panel down to 2-1/2" high. Save the cut-off piece for your strips.

2. Die cut the top of the front flap with the tree edgelit. Keep the top cutting plate up to the score line only so the back panel stays whole.

3. Layer the tree strips on the front flap, tuck in the house, add "Noel" on Dimensionals, and finish decorating.

4. Swing the stable door open to reveal the message panel tucked behind it.
